

## for the automotive industry

Safety and reliability are the key drivers in the automotive industry along with quality. GlobeTech provides the industry with specialized testing, calibration, measurements, validation and inspection services to ensure compliance with the stringent automotive regulations, standards and legislation as well as principals requirements such as BER.

The automotive industry is subject to strict regulations, standards and legislation. As a result, your organization must continually meet and improve on the highest levels of safety and reliability. We offer you a broad range of specialized services to help your business run safely and on budget. We create confidence in the delivery of services, and help you fulfill compliance.

As a leading provider of services, we offer expertise in regulation and standard compliance. Our experienced team of professionals, work closely with your quality assurance departments to ensure you meet the required standards. Furthermore our testing and calibration laboratories are fully accredited and operate in accordance with the EN ISO / IEC 17025

### **GlobeTech broad range of services includes the following:**

Calibration and Testing constitute fundamental operations of the automotive industry. GlobeTech is dedicated to assist its clients in developing, implementing and maintaining the safety and reliability of their engineering as well as quality, and occupational health& safety. GlobeTech offers:

- Calibration of all type of instruments and equipment on-site and in Lab (scheduled periodic calibration)
- Calibration of MOT stations
- Testing of auxiliary equipment and tools
- Testing, Inspection and verification of jacks and hoists
- Inspection services
- Health, safety and environment measurements.

For such critical services you need a partner you can trust. With our accredited laboratories, you can be sure that you are fully complying with the stringent regulations, standards and legislation.

Testing and Calibration are ongoing activities covering efficient safety, reliability as well as quality.

- ✓ Calibration – It is mandatory in the automotive industry to have properly calibrated and tested equipment. Our calibration service is specifically designed to meet industry's calibration needs. We perform calibration of all type of instruments and equipment on-site and in Lab (scheduled periodic calibration).
- ✓ Testing and Inspection – Testing and Inspection is integral to safety and reliability. With the industries increasingly subject to scrutiny, testing to ensure compliance with safety regulations is a must.
- ✓ Health, Safety and Environment measurements as well as inspection are essential to demonstrate compliance to regulation. Our services are specifically designed to meet industry's needs.
