

GlobeTech provides the Energy, Oil & Gas industry with specialized calibration, testing, validation, instrumentation commissioning and measurements services to ensure compliance with the industry's stringent regulations, standards and legislation.

As a leading provider of services, our approach and dedication to quality and safety allow us to support your operations in every part of the energy, oil and gas industry. Our services extend to both upstream and downstream sectors as well as refining, storage and distribution, petrochemical and power generation. We focus on responding to customer needs and delivering competitive advantage.

Our experienced team of professionals work closely with your production, quality assurance and HSE departments to ensure you meet the required standards. Furthermore our calibration laboratories are fully accredited and operate in accordance with the EN ISO / IEC 17025

GlobeTech broad range of services includes the following:

Calibration, testing, validation, instrumentation commissioning and measurements constitute fundamental operations of the energy, oil & gas sector. GlobeTech is dedicated to assist its clients in developing, implementing and maintaining the safety and quality as well as offer measurements for sustainability (health, safety and environmental). GlobeTech offers:

- Calibration of all type of instruments and equipment on-site and in Lab (including storage tank calibration) as well as offshore
- Testing (including equipment and auxiliary testing such as valves, ropes etc.)
- Commissioning and validation including Instrumentation
- Inspection services
- Health, safety and environment measurements including, emissions, air quality, noise etc.

For such critical services you need a partner you can trust. With our accredited laboratories, you can be sure that you are fully complying with quality and safety guidelines.

- ✓ Properly calibrated and tested equipment is vital in the energy, oil and gas industry. Our calibration service is specifically designed to meet industry's calibration needs. It is essential to ensure that all equipment that meters, measures or allocates extracted hydrocarbons is in optimal working condition and providing accurate information. We provide logging and calibration services, emissions measurements and metering services to ensure the highest level of measurement accuracy. For the downstream sector, we offer support to refinery, storage, distribution and retail, including calibration services, valve testing and leak detection. In addition we offer inspection services at all of the stages.
- ✓ One of the most challenging and critical aspects of any project is the commissioning stage of the facility as it is responsible for the successful start of the operation within the planned schedule. Our commissioning services extend from instrumentation to facility commissioning.
- ✓ Health, Safety and Environment measurements as well as inspection are essential to demonstrate compliance to regulation. Our services are specifically designed to meet industry's needs.
