

For almost 20 years, companies rely on us to ensure the quality and safety of their processes and products as well as compliance with the national and international regulations.

Whatever industry you are in, you can rely on our services and teams of experts to provide you with solutions to make your business upgrade the quality and competitiveness but at the same time to minimise the adverse health and environmental impact.

GlobeTech was established in 1995 to provide services in the areas of Calibration, Precision Measurement, Testing & Product Certification, Inspection, Consultancy and Applied Research. The Company's Aim was to substantially support the state's effort in developing the activity of Metrology in Cyprus whereas at the same time to offer its clients high quality services and complete solutions to their problems.

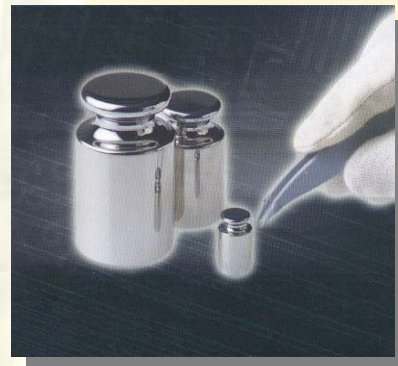

Today GlobeTech network covers more than 15 countries, through subsidiaries, representatives and partnerships. Our aim is to add value to our customers by substantially upgrade the quality and competitiveness of our customers in the Local and Global market by offering them the most competitive and the most productive services.

Drawing on a wealth of experience from various industries GlobeTech meet and exceed customer's requirements. With businesses having to place greater emphasis on quality and safety, confidence in measurement is paramount.

Highly qualified and motivated individuals, all with the necessary academic and professional experience, along with a state-of-the-art Laboratories enables GlobeTech to offer its wide range of specialised services conforming to the most exacting standards.

The fully environmentally controlled Laboratories are supported by mobile units, equipped with primary standards of high accuracy and operates in accordance with the international specifications set out by the guidelines of ISO 17025 of which we are accredited. Furthermore the company's trained personnel follow documented procedures that are recognised by international organisations, for all calibrations and testing activities. The company is committed in providing professional and quality services and has therefore implemented an internal Quality Assurance System throughout all its operations.

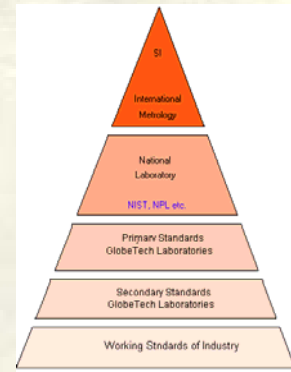

QUALITY POLICY

Our policy is "To continuously improve and upgrade the organisation, its procedures and the professionalism of all personnel so that the services provided are of the highest quality standard". The major key to our success is the trust we inspire our customers by our commitment to the highest standard of integrity and professional ethics.

TRACEABILITY OF MEASUREMENTS

The major requirement of ISO 17025 is the traceability of measurements, which is fully fulfilled by GlobeTech Laboratories.

The traceability of the services offered by our Laboratories is assured by the chain of calibrations with standards of higher accuracy, the National and/or International Standards being the end-point along the calibration traceability trail.

Network

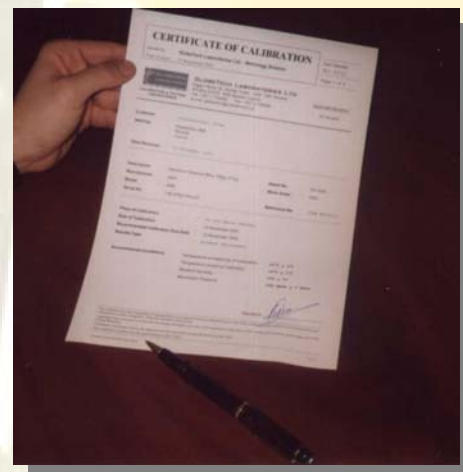

Today GlobeTech network covers more than 15 countries, through subsidiaries, representatives and partnerships.

GlobeTech Laboratories comprises of Metrology and Calibrations Laboratories with full environmental control, Testing Laboratories, Electrical & Electronics Testing and Repairs Laboratories, storage facilities, offices, administration & accounting and library.
